Remaining 2017 Fleet Operating Days (as at 09/2017)

Demand Strong – Positive L/T Outlook

Strong potential of China and India with a combined population of 2.5 billion in a world of 7.0 billion. Their per capita oil consumption is at extremely low levels and have already embarked on an aggressive industrialization program

If China reaches the same levels of consumption per capita as Thailand, Chinese oil demand (based on existing population) would rise to 18mbpd, an increase of 10mbpd from current levels

Non-OECD demand and in particular China and India continue to be the main drivers behind oil demand growth in 2016 and 2017. China's growth in 2016 was **2.6%** to 11.8mbpd and expected at **+4.5%** to 12.4mbpd in 2017. India's growth for 2016 was at **7.3%** to 4.5mbpd and is expected to grow by **3.3%** to 4.7mbpd in 2017.

Oil demand expected to remain positive in the non-OECD (up 1.9% in 2016 from 2015 and expected to grow by 2.5% in 2017)

IEA expects oil demand to continue growing => 96.1mbpd in 2016, **+1.3mbpd** over 2015. Estimates for 2017 are at 97.6mbpd, **+1.6mbpd** over 2016

Crude oil tankers outlook strong and products following due to high global refinery utilization and strong refinery margins

Global activity continues to strengthen. GDP growth of **3.2%** in 2016 and expected growth of **3.5%** in 2017 and **3.6%** in 2018.

BARRELS OF OIL PER CAPITA PER ANNUM
(Source: BP Statistical Review of World Energy June 2017)

Oil Price vs. Global Oil Demand (in mbpd)

Tanker Orderbook/Delivery Schedule vs. Fleet >15 years

- ❑ **Total Orderbook of 477 tankers** to join the fleet over the next three years vs. **810 vessels in fleet over 15 years** of age (This does NOT include vessels in the 10-14 year age bracket some of which will be around the 15 year mark by 2018/19, a good part of which would be unattractive to the oil majors in 2018)
- ❑ **Shrinking Orderbook** - In 2010 the tanker orderbook (vessels >30K dwt) reached 22.3%. In August 2017 it stood at around **10.5%** (15.6% in May 2016)

Solid Growth Through Cycles - Secured Dividend Payments

- TEN has always paid a dividend irrespective of market cycles; \$10.56 per share in total dividends since inception
- Long-term nature of Company's employment policy provides cash flow sustainability and visibility

NOTE: EBITDA and Dividend numbers in USD millions
